

**Making Beaches Accessible; Pafos:** Pafos has ensured that the beaches that are an essential part of the tourism offer on the Island are accessible beyond the norm of accessible beaches. Most beaches in Pafos are fully accessible, offering a complete sun and sea experience for all tourists and residents alike. This includes reserved parking, access ramps, walkways, amphibious chairs, accessible changing rooms, etc.

**La Concha Beach, assisted bathing service; San Sebastián:** The tide makes it difficult to install permanent footbridges during the summer season, however, the La Concha Beach has an assisted bathing service. The latter includes the use of an “amphibious vehicle” that, with the help of one or two monitors, allows mobility both on the sand and in the water. This system allows people with reduced mobility to enjoy the beach.
