Green labels for the city – Old Vine House; Maribor: The Maribor Tourist Board in cooperation with local partners decided to apply Maribor as the green destination of Slovenia and has come up with a detailed action plan with laid-out environmental goals. One of the institutions implementing the action plan and serving as a green label example is the Old Vine House that in 2020 was awarded the Green Key ecolabel by the National office in Slovenia. For obtaining the certificate, the provider must meet 13 criteria of evaluation, ranging from environmental management, guest information, waste and water management, energy efficiency to staff engagement and other criteria. In 2021, the Old Vine House was also awarded the Slovenia Green Attraction logo.
