Collaborating member of the Smart Destinations Network

SMART HERITAGE

This is an IoT solution that intelligently uses information from environmental and structural sensors. It allows this information to be managed well, especially in terms of **preventative management, and also the management of security and protection, energy efficiency, lighting and lighting use.**

It also helps digitalise elements of cultural heritage, by including informative screens and other audio-visual elements.

Scope of smart destination application

**Technology
Sustainability**

Solutions for destinations in the following areas

Type of solution
