INTERACTIVE VIRTUAL TOURIST OFFICE

Thanks to its expertise in the tourism sector and Real Web development, Ideanto Comunicación has created a product that will add value to destinations, provide a mass of data, and impress visitors.

The **Virtual Tourist Office provides a 3D environment**, integrates chatbots that work with the information contained on the Internet and thanks to this, provides metrics, additional data and leads resulting from conversations with travellers.

The Virtual Tourist Office is marketed directly to destinations (municipalities, cities, regions, etc.), the content being tailored to each one.

Scope of smart destination application

**Technology
Governance**
