Collaborating member of the Smart Destinations Network

SUSTAINABLE DEVELOPMENT PROFILE (SDG)

This project promotes the **contribution of local and regional agendas, especially those linked to tourist destinations, to the 2030 Agenda, pursuing the Sustainable Development Goals (SDGs).**

It promotes adaptation to two of the current cornerstones of competitiveness: sustainability and innovation. This is in line with the commitment to comply with the SDGs, which in a time like the present, require a firm commitment to safety, in a broad sense, as well as to sustainability.

The aim of the project is to provide a technical assistance service for the diagnostic analysis of plans and projects, within the framework of compliance with the SDGs, and with the following objectives:

Identify how the actions, plans and programmes in place within the tourist destination contribute towards achieving the SDGs.
Contribute towards public bodies implementing and complying with the 2030 Agenda.

Scope of smart destination application

**Governance
Sustainability**

Solutions for destinations in the following areas
