## REAL WEB

If we live life in 3D, why is web browsing still 2D? Ideanto has changed the way of understanding a web page, creating spaces in 360° or in interactive 3D to change the user's browsing experience.

In more than six years of development, the company has managed to create **the only website in the world with a 360° environment based and managed from WordPress**, where users can navigate both in a traditional way (through menus) as well as interact with the elements of the environment (videos, digital signage, PDFs, 360° videos, etc.). Naturally, both the static and dynamic content can be changed easily. All with versions developed specifically for mobile, for that work perfectly on any device.

Real Web is **perfect for adding value to any space** (tourist attractions, hotels, restaurants, golf courses, beach clubs, etc.).
