Collaborating member of the Smart Destinations Network

ONEPASS

Distributed registration and deep neuro-evolution learning technologies used to create a **single European multi-modal digital transport ticket**.

OnePass is a technological tool that uses **blockchain and artificial intelligence to create** a multi-modal digital ticket. This system will allow **all the modes of transport travellers need during their trip to be combined into one single ticket**. It will also feature a route planning and recommendation tool.

This solution has been developed in collaboration with the University of Salamanca.

Scope of smart destination application

**Technology
Innovation**

Solutions for destinations in the
following areas
