## SENSITIVESPACE

A tool that can **turn any space into an interactive space**. It allows precise management of which events to launch and which elements to interact with. It permits users to communicate with lights, projectors and other computers and generate spaces and sound or video elements simply by approaching them. Its accuracy allows users to control where in the space, or at what distance, different events from a presentation are triggered.

It is ideal for meeting rooms and events at which users innovatively manage presentation times.

Sensitivespace allows users to set up a room in less than five minutes, and manage content remotely from VideoEnPlay, its Digital Signage app.

Scope of smart destination application

**Technology  
Innovation**

Solutions for destinations in the  
following areas
