TUR4ALL – ACCESSIBLE TOURISM FOR ALL

TUR4all, "Accessible tourism for all", is a collaborative platform **created by PREDIF with the support of the Spanish Secretary of State for Tourism** (R&D&I entrepreneur project) and Fundación Vodafone España. Its aim is **to provide precise, accurate information on the accessibility of destinations' tourism resources**, such as hotels, restaurants, museums, monuments, natural spaces, beaches, accessible transport, destinations and experiences, and more.

It is available in 11 languages (Spanish, Catalan, Valencian, Galician, Basque, Portuguese, English, French, German, Italian and Mandarin Chinese) and its purpose is to provide people with accessibility needs with a greater degree of confidence in planning their holiday. In addition, it acts as a promotional channel for establishments and accessible tourist destinations.

In terms of **international development**, it has been rolled out in Portugal and Germany through agreements made with Accessible Portugal and the German Tourist Office. The company is now working towards internationalisation in several countries around the world, such as Peru, Colombia, Argentina and India, where resources can already be accessed thanks to collaborations.

On this platform, both users and experts can evaluate, rate and add comments on the accessibility of tourist establishments.

Moreover, on the complementary Plan Your Journey website, TUR4all provides practical, useful information for planning a trip to different destinations, especially for people with accessibility needs.

TUR4all is a reliable, accurate source of information about accessibility in destinations for the almost 200,000 users who visit every year.
