SMART WATER METERING

This is an **end-to-end meter reading** solution that allows water companies to **collect users' water consumption readings remotely**, leading to precise billing and more sustainable water management.

It also allows smart meters to be monitored and managed remotely, and therefore equipment malfunctions can be detected, and reading settings can be configured in line with customer needs. The main features of the solution are:

- Flexibility
- Centralised management
- Openness
- End-to-end security
- Scalability
- Implementation in hostile environments
- Battery life is over 10 years
- Certified

Scope of smart destination application

**Technology
Sustainability**

Solutions for destinations in the following areas
