SOLARIA9®

TOUCH SCREEN TOURIST INFORMATION KIOSKS

Solaria9 offer touch screen platforms developed especially for municipalities and tourism. Their service consists of unique, personalised content design for **touch screen display totems for tourist information, which can be installed indoors or outdoors.**

They focus on user experience and interface design, ensuring that the system is intuitive and easy to use for any visitor, regardless of whether they have any technical knowledge or are used to using touch screens. Each project is tailored to the requirements of each municipality, and service and content updates are performed immediately from the data centre.

Their totem displays are designed for intensive use, with ingress protection code IP65, anti-vandalism, automatic brightness control and the option to add extra hardware such as mobile phone charging points, a Wi-Fi hotspot and much more. Their projects are integrated with all the different kinds of sensors available, such as: proximity, lift and learn, temperature, air gesture, voice recognition, gender recognition and more.

They provide all the hardware needed for digital projects, touch screen kiosks, LED screens, LCD screens and

interactive smart boards, and have their own software to update and publish content.

They also have a professional team consisting of two developers with expert knowledge of Intuiface, a graphic designer and a specialist in user interface (UI) design, user experience (UX) design and interaction design (IXD). They work from the cities of Ceuta and Malaga, sending and installing their devices across the whole country.

They have designed a wide range of apps where their municipality can display, among other elements:

- Places of interest
- Tourist attractions
- Regional events
- Multimedia galleries
- Weather reports
- Transport
- Out-of-hours chemists
- News
- Marketing
- Cultural calendars
- Surveys
- Tourist routes
- Gastronomy
- Fairs and festivals
- Craftwork
- Emergency services
- Advertisements
- Complaints and suggestions
