Hearing is believing; València: The main tourist information office offers the modern Visualfy system for people with hearing loss. This innovative AI system detects relevant alerts in the environments and sends visual notifications to the user's smartphone, smartwatch or smartband through sound. By taking this step forward, València is not only going the extra step to ensure that all visitors are afforded the same degree of accommodation but in doing so is implementing a smart approach to making its tourist information services more accessible.

4.1.2.5 Accessibility through digitalisation; Porto; Florence; Gaziantep

Innovative Signage makes world of colour accessible to colour blind, Porto: Born in Porto, the ColourADD has reached worldwide acclaim as an innovation in helping people who are colour-blind participate in the colour dominated world of signage. Here in the city, it appears on tourist maps, flags and Ecopoints on the beaches and on car parks to help everyone navigate, understand, and feel welcome to an accessible experience of the city.

KIMAP - navigation app for disabled people; Florence: The historic centre of Florence presents some objective difficulties for visitors with reduced mobility (especially in the oldest area of the city: narrow pavements, cobblestone pavements, uneven surfaces). In recent years the city has provided a kit (IT/EN) to facilitate and encourage tourism for disabled people which also includes the Kimap APP, which can be downloaded for free. Kimap allows users with mobility difficulties to find the most accessible and suitable path to reach destinations. The app provides 4 tour guides with historical-artistic itineraries connected to city mapping in open data for barrier-free tourism to explore the city in
