URBAN GOODS DISTRIBUTION LOADING AND UNLOADING AREA

Telefónica has developed this service with the aim of **speeding up the occupancy of loading and unloading spaces** through prior booking, via a mobile app featuring two types of profile.

- Driver: to register parking areas and check available spaces in loading/unloading areas.
- Visitor: to quickly and efficiently check the vehicle parking status in loading/unloading areas.

Through this service, clients will be able to check the status of parking areas, occupancy statistics and platform settings.

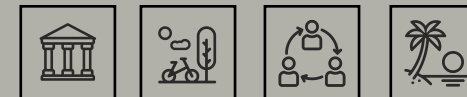

The main benefits of implementing this solution are:

- **Reduction in undisciplined parking** in loading and unloading areas (-50%)
- **Increased rotation and free space availability** (+30%)
