INTEGRATED CAPACITY MANAGEMENT FOR PRIVATE AND PUBLIC PREMISES

Using overhead cameras and artificial intelligence software, this solution provides information on the footfall and occupancy of a building. It includes all the necessary elements for its roll out:

- Specialised high-precision people-counting cameras with automatic elimination of redundant information
- Real-time access by the manager to the data via mobile device (phone/tablet) or PC
- Automatic sending of footfall reports by email
- Alert on system failures
- Electronic network
- Installation and start up of equipment
- Technical management
- For three years: software licenses, remote preventative and corrective maintenance, telephone and remote support and access to data via APIs or daily sending of data via email
- Training workshop

- The counting devices have a five-year manufacturer's guarantee
- Colour-coded visitor capacity information screens and incorporation of advertising where appropriate.
- Detection of hot and cold zones
- Optimisation of energy consumption
- Digitalisation and integration with the alarm system on things like: toilet cleaning, visitor satisfaction, the physical and virtual customer experience, and disinfection, compliance with data protection regulations, as people are not recorded or identified.

Scope of smart destination application

Solutions for destinations in the following areas

Type of solution
