TRABITAT

TRABITAT is a B2B2C digital ecosystem (app and/or website) that brings different tools, products and services together in one place.

TRABITAT **facilitates communication and connection between travellers, companies, institutions and destinations**, simplifying the objectives of the different stakeholders within the tourism industry. TRABITAT is flexible and adaptable, and consists of the following modules: digital identity, health, payments, travel market, a sustainable loyalty programme, an entertainment channel and geo-habits.

TRABITAT, developed by Wanderlust Global Life, provides a tool that is useful and practical for both holidays and everyday life.

In our "new normal", TRABITAT facilitates digital transformation, while at the same time allowing progress to be made towards the responsible reactivation of tourism around the world.

Scope of smart destination application	Solutions for destinations in the following areas	Type of solution
