VISIT EXPERIENCE

YBVR **develops immersive experiences over the internet**, offering:

- Production of 360º, high-quality video (up to 8K-60fps), both live and recorded, enriched with real-time data, dynamic graphics, conventional video and high fidelity audio
- Its **internet-based video distribution platform** maximises quality, reducing the bandwidth needed Totally scalable to respond to the needs of all audiences
- **Immersive apps** to convert access to the content into an immersive experience, for mobile devices, tablets, PCs and above all, virtual reality glasses. With instant camera change and multi-screen menu (control room).

Especially designed for the tourism environment, it offers VISIT Experience, which in addition to the use of its technology, offers tourist destinations the possibility to create virtual tickets, opening the doors of their experience to the digital world, both with on-demand content and the broadcasting of live events.

- Fully **integrable** with its ticketing platforms
- Enables **the sale of tickets to visitors who travel virtually** from the USA, Korea or any part of the world
- Opens up a new line of income, mitigating the impact of Covid-19 and with great potential for future development.

Scope of smart destination application	Solutions for destinations in the following areas	Type of solution
