KEVO TECHNOLOGIES

Startup dedicated to the development of smart conversational interfaces for robotic process automation (RPA) which replicates the actions of a human for tasks that require interaction and management, freeing up human resources for tasks that add value to the business.

NEELO

NEELO is a **Tourism Intelligence system that operates through a multi-platform voicebot** with access to price data information, hotel occupancy, transport, movement of people and the leisure and events calendar of a destination.

NEELO is able to upload, process and analyse that information to transform it into knowledge relevant to the destination and all agents linked to its management.

The **capabilities** of the latest generation of NEELO make it possible to hold completely open, real-time conversations that are not all linked to flows:

- Integration of multi-platform chat with WhatsApp, Telegram, Twitter, Facebook Messenger, plug-ins, websites, etc.
- Voice communication in five languages and text communication in over 100 languages. Back-office integration of Smart Tourism System
- Ad-hoc work flow personalisation and robotic process automation
- Artificial Intelligence System with cutting-edge cognitive capabilities, able to extract trends and discourse through conversations with the system

Scope of smart destination application	Solutions for destinations in the following areas	Type of solution
